AWARDS AND CERTIFICATIONS

Most Innovative Research

ICT College Fair and Symposium of STI College Ortigas-Cainta

2024

- The thesis project is a software program entitled Traffic Simulation on Intersection, which intends to give resolution to various traffic-related problems. It incorporates two algorithms that may be used to judge various traffic conditions, namely Fuzzy Logic algorithm and Best-first search algorithm. The application generates reports that users may use as a reference for future planning and execution.

- Roles: UI Designer and Front-End Developer

Responsive Web Design

freeCodeCamp

June 2024

WORK EXPERIENCE

UX Intern

VIA Appia Philippines Inc.

March - May 2024

- Learned UI/UX concepts and translate user stories into beautiful and intuitive interfaces by creating screens through Figma.
